EXPERIENCE

Initia Labs

Jul 2024 - Present

Chief Product Officer | Head of Integrations to Head of Product to CPO

- Lead product across Initia's rollup stack, wallets, and developer tooling as CPO, after progressing from Head of Integrations to Head of Product.
- Ideated, designed, and implemented Autosign wallets so onchain apps stop interrupting users with a wallet prompt per action; first live in Civitia, where gameplay activity rose ~25% at launch.
- Ideated and designed Weave, the guided CLI that replaced four separately configured programs and became how Initia rollups deploy, local and hosted.

Alles Labs

Dec 2022 - Jun 2024

Founder and CEO | Acquired by Initia Labs

- Founded Alles Labs and built Celatone from our own internal tool into the main explorer and contract interface for Cosmos SDK chains; 5 chains became paying customers and ~126K people used it in its best month.
- Led product, engineering, sales, and operations end to end through acquisition by Initia in June 2024.

Nebula Protocol

Oct 2021 - Nov 2022

Project Lead

- Led Nebula Protocol on Terra end to end: mechanism design, smart contracts, tokenomics, and go-to-market, from concept through public testnet and launch.

Band Protocol

Mar 2020 - Sep 2021

Integration Lead

- Wired Band's oracle into Arbitrum, Polkadot, Injective, BNB Chain, and Fantom (now Sonic), owning each integration from partner scoping through smart contracts, SDKs, docs, and production rollout.

EDUCATION

University of Michigan

2015 - 2019

Bachelor of Science in Computer Science
